## WORK EXPERIENCE

### GRAB

**Jul 2019 — Present**

Full Stack Developer

Part of the Merchant tech family, which involves products being built centered towards merchants.

I am majorly involved with Settlements team which takes care of all payments related to merchant.

As a developer, I contribute towards :-

- 1) Designing and developing scalable solutions for feature requests pertaining to merchant payments.
- 2) Developing front end dashboard for payment support team to easily carry out and handle payments for merchants that might have been restricted by the system.
- 3) Developing scalable solutions pertaining to reporting service which helps merchants reconcile their payments.

### Delhivery

**June 2018 — June 2019**

Full Stack Developer

At delhivery, i am a part of last mile team consisting of the business flow towards the customers. The last mile team takes care of all the dispatch creation and delivery and pickup of parcels to and from the customer.

As a full stack developer I contributed in:

- 1) optimising the dispatch creation and completion flow by building features to reduce manual intervention like automatic updation of package status when the dispatch is being closed etc to reduce total turnaround time for dispatch completion.
- 2) Building UI for the dispatch creation
- 3) Revamp of the eye dashboard which is being used by operations team consisting of widgets and graphs to help them visualise real time data.

### Quovantis Technologies

**July 2016 — Jun 2018**

Software Engineer

Worked across multiple products majorly covering:-

- 1) Unity Influence - It's a platform where brands and influencers meet. The brands conduct various campaigns for their products and chose Unity to find influencers for their marketing. I contributed in building the campaign and brand onboarding module and making certain cron jobs for triggering emails to influencers.
- 2) Reality One - A real state consultancy scheduling and conducting interviews of various real state agents coming to their platform. I contributed in building the module for scheduling and managing agent interviews.
