OBJECTIVE

To work in an organization where I can utilize my full potential in a technology driven environment and hence get nurtured into a high caliber individual.

PROFESSIONAL PROFILE

Around close to 2 years of experience as Software Engineer in Quovantis Technologies. During this tenure, I worked majorly on the front end stack comprising of HTML ,CSS, SASS, Bootstrap, Jquery, javascript, AngularJs.Developed an internal project hours tracking system used by the development team to track hours for billing to clients using HTML,CSS,MySQL,php. Received sprint champion award for outstanding work.

PROJECTS UNDERTAKEN

- UnityInfluence
  This product involves influencer marketing by connecting brands and influencers directly.The brands can manage the content creation uptil publishing of the content of the influencer.The tech stack includes Angular and Python. I majorly contributed in the front end stack involving Angular 4.

- YelpCamp
  Yelpcamp is a self made project using HTML,CSS,Node.js and MongoDB.The application lists the campgrounds uploaded by users and other users can view and review the campgrounds.The working url is - https://app-yelpcamp.herokuapp.com/ .

- Reality One
  This product involved interview tracking of agents for the Real States and onboarding them into the company.The product was built using HTML, CSS, MySQL, Jquery, php. I majorly contributed in the front end stack and developed a responsive web application for the client.

- Emotionalytics - Advertisement & Video Analytics
  A Java based Application on Facial Emotion Recognition in which a user is made to watch a video and the facial expressions are stored and classified into categories via a trained classifier. Based on the analysis of the classified emotions, we can find the overall emotion of the video which can further be used to tell the success/ virality of the video.
